

ServiceTrade Integration

Automated Data Synchronization

Connect ServiceTrade with Sage Intacct's robust accounting capability to achieve faster, more accurate invoicing, eliminate double data entry, and gain better insight into your business.

Helping commercial service contractors sync critical data between operational and financial systems for faster, more accurate accounting

Improve Accuracy

Faster, automated data entry means fewer mistakes to deal with at the end of each period.

Increase Productivity

Increase productivity by eliminating the need to reenter the same data across multiple systems.

Single Source of Truth for Customer Records

Choose either ServiceTrade or Sage Intacct as your master system for customer information.

Maximize Technology Investments

Leverage the benefits of Sage Intacct's dimensions (departments, employees, locations) using information you already have in ServiceTrade.

Easier & Faster Invoicing

Invoice immediately after service delivery, not days or weeks later.

Improve Cash Flow

Faster invoicing and collections improve cash flow by reducing the days of sales outstanding (DSO).

Gain Better Insights into Your Business

Dashboards provide real-time information and increased visibility on the financial status of company.

Requirements

Sage Intacct Core Financials, Platform Services, Order Entry, Basic Project Tracking (Dimensions).
