

AP Automation for Sage Intacct

If your finance team is ready to get the most out of Sage Intacct, there's no better solution than AP automation. And because there are so many options to choose from — including Sage's own AP product — we've created a guide to help you find the right fit for your business.

The Benefits of Using AP Automation

By pairing AP automation software with the ERP your team already uses, you can remove departmental silos to achieve visibility over your entire payables process, leading to:

Improved Accuracy

Automated authentication of invoices and purchase orders greatly decreases the risk of error that comes with manual data entry.

Reduced Costs

The average **cost to process a single invoice is \$10**, and AP automation takes that down to \$2 through the elimination of manual tasks.

Time Savings

Streamlined workflows don't require anyone's intervention to keep moving, so your team can focus on more high-value initiatives.

How is PairSoft Different?

PairSoft's robust system gives you all the savings and accuracy of AP automation and combines them with market-leading features, transforming your team from reactive to proactive:

Native Integration

PairSoft's longstanding partnership with Sage Intacct means it sits right within the ERP window, so your team can continue using the system they know without special training.

Document Management

Collaborate with your team from anywhere in the world with a centralized, end-to-end encrypted document database that has rapid search indexing and downloadable reports for easy audits.

All-In Subscription

With a subscription bundle that includes support, data usage, and software usage, you won't have to pay for extra licenses with PairSoft if a non-Intacct user needs to view or approve an invoice.

AP-Centric Workflows

Decades of refining our integrated technology have resulted in out-of-the-box workflows specifically designed for both your invoice process and your ERP, giving you a dedicated accounts payable system.

Instant Invoice Capture

PairSoft's OCR technology effortlessly scans and auto-fills invoice data before three-way-matching it against your records, with the ability to digitally staple documents for automatic batching.

Efficient Onboarding

PairSoft's experience with thousands of customers has helped us refine our onboarding process down to a science, so your AP automation suite can be implemented in a matter of weeks.
