## Advanced Technologies

**A/P One incorporates** cutting edge AI to provide smart automation. Workflows can be customized to meet virtually any business need and are easily managed by your teams.

### Learning technologies that automatically determine an approval path without user intervention.

For non-PO invoices, we include technology that auto codes an invoice for you, even it requires multiple general ledger distributions.

### AI-powered SmartMatch PO matching technology for automated matching at the line level.

For both inventory and general goods and services invoices, it delivers extremely high levels of matching without human intervention. This way, we create a truly touchless process.

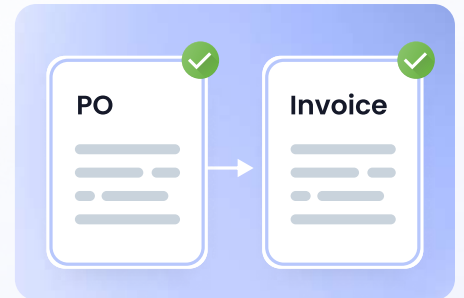

### Integration to your accounting and ERP solutions.

Our dozens of out of the box, tightly integrated solutions including API connectivity to virtually any back-end system allows for a seamless integration between A/P One and your accounting or ERP system.

## Success Story:

### Orthopediatrics: 93% of POs Automatically Matched

Orthopediatrics is experiencing 93% straight through processing from supplier email to the ERP – completely touchless by human hands. And this isn't PO header matching. We automatically match each and every line on the PO – even when there is no part number or SKU! We'd love to show you how it works.

*This was my second time implementing a CoreIntegrator solution. That's the highest compliment I can pay to it. It works so well that we chose it again for Starr after I had already implemented it for a previous employer.*
