

Advanced Revenue Recognition

RightRev empowers businesses to automate revenue recognition in compliance with ASC 606 and IFRS 15. Built with an API-first model, RightRev ingests data from your upstream sources, enabling revenue recognition automation. Configure revenue to be recognized upon bookings, billings, delivery, milestones, usage, or other user-defined events and distribute ratably or at a point-in-time. Journal entries are automatically generated and posted to Sage Intacct, ensuring accurate and timely revenue reporting.

Key Features

Revenue Recognition Automation

Automate revenue accounting based on bookings, billings, usage, project milestones, percentage of completion, and more.

Revenue Waterfall & GAAP Reporting

Revenue waterfall reports for booked and projected deferred revenue. Built-in GAAP reporting capabilities keep you compliance-ready.

SSP Calculation

Automatically apply SSP to performance obligations and allocate across bundled contracts.

Contract Modifications

Automatically group amendments and recalculate revenue.

Lease Accounting

Keep track of non-lease and lease revenue contract details all in one place.

Journal Entries

Automatically post daily or scheduled revenue journal entries directly to Sage Intacct.

Automate Revenue Recognition... The Right Way

Real-time Revenue

RightRev was built with every revenue recognition scenario in mind, from simple to the most complex. Achieve up to 100% automation of your revenue recognition process...in real-time.

Flexible Configuration

Flexibility is key to staying competitive in evolving global markets. Implement a solution that meets your needs today while allowing you to adapt to new business models in the future with minimal business disruption.

Unmatched Scalability

Our modern infrastructure sets a new standard for handling high-volume transaction throughput. RightRev can process hundreds of millions of transactions in minutes-performance unmatched by any other solution.

As we think about the future of Epicor, we think about scalability, completeness, and accuracy of data, and automation. As these objectives are difficult to obtain with our current manual processes, we have decided to partner with RightRev to help streamline not just how we do things today, but how we want to do things for the foreseeable future."
