

# Econz Wireless Time Tracking for Construction

*Streamline Workforce Management and Job Costing*

Econz Wireless Timecard is the ultimate time and attendance solution for construction companies, providing accurate tracking, compliance management, and seamless payroll integration with multiple job costing and payroll systems. With Econz, your clients can minimize payroll errors, handle complex over-time, prevent buddy punching, and boost job costing accuracy by allocating labor costs to specific jobs, tasks, teams, unions, and trades.

## Econz Differentiators for Construction

- Overtime can be specific to project, classification, a union job, or to state doing work in.
- Ability to handle multiple company codes and multiple pay frequencies within an organization.
- Allocate time by jobs specific to trade, project, team, or within a radius.
- Project approvals that allow managers to view labor specific to his/her team or project.
- Robust California meal & rest break solution that alerts employees when to take breaks and helps employers comply with the laws.
- Can pull earning codes specific from Sage (bonus, commission, emergency work, travel) and other payroll providers.
- GPS & Geofencing technology with location discrepancy report and other reports.
- Employees can log time even without connectivity, and data syncs when back online.
- Digital Form features including PDF and Excel output with photos.
- Spanish-speaking customer service and Construction Implementation Success Coaches.

## Key Features for Construction

### Crew Clock and Job Allocation

A supervisor can clock in their entire crew and assign job and tasks by project, phases, trade, or geofenced location from one device.

### Kiosk and Mobile App Clock-In Options

Employees can clock in using a tablet kiosk with facial recognition. Our Timecard GPS Mobile App tracks employee location in real time and work hours from any mobile device.

Offline mode allows time tracking even in areas with no internet connectivity.

## Digital Forms and California Meal & Rest Break Compliance Management

Help employers comply with California meal & rest break laws with real-time alerts and digital confirmations. Attestation forms, end-of-day surveys, custom jobsite forms (including incident reports and equipment logs) help protect employers.

### Signature & Photo Captures

Allows field employees to digitally capture signatures and submit relevant job site photographs back to head office.

## Real-Time GPS Tracking & Geofencing

Monitor workforce locations with GPS tracking, enforce jobsite attendance with custom geofences. Breadcrumb GPS tracking updates every 60 seconds. Tracks idle time and speed triggers for safety and compliance monitoring.

## Seamless Sync Sage Intacct

Projects, Cost Codes, and Address by company into Timecard with our auto sync for real time access to information. Our Timecard also integrates with many payroll platforms for automated payroll processes.

## Multi-Level Approvals & Project-Based Overtime Management

Supervisors and project managers can approve labor hours by job. Set overtime rules based on project, trade, union agreements, or state laws. Automated premium pay calculations for meal/rest break violations. Overtime alerts to manage excessive work hours and prevent payroll errors.

## Comprehensive Reporting & Scheduling

Robust reporting capabilities (45+ types of reports) and in-app scheduler.
