

# Sync your transactions with Sage Intacct

Month-end used to mean messy spreadsheets, manual data entry, and hours wasted tracking down receipts. With Coast's Sage Intacct integration, sync enriched transaction data in real time, categorize with ease, and close your books faster.

The screenshot shows the Coast interface for exporting transactions to Sage Intacct. The top navigation bar includes 'coast' and 'Exporting to Sage Intacct'. Below this, there are filters for 'Needs Review' (08) and 'Marked for Export' (5,000). A table of transactions is displayed with columns: Merchant, Date, Category, Amount, User, Department, Receipt, and Memo. The table contains 15 rows of transaction data. At the bottom right, it says 'Rows per page: 1-25 of 100'.

Merchant	Date	Category	Amount	User	Department	Receipt	Memo

## Real-time syncing with Sage Intacct

To ensure consistency, all the details you need — from vendors and accounting categories to class — are synced in real time from Sage Intacct to Coast, and always up to date.

## Smarter, faster review and coding

Require card users to code their transaction directly from their phone.

Once you're ready, audit and code transactions effortlessly, with full context at your fingertips: card user, department, receipt, memo, and more.

## One-click export to Sage Intacct

Push enriched transactions to Sage Intacct in just one click, including receipts, memos, and custom fields.

All you'll have to do is do a final triple-check in Sage Intacct.

## Powerful automations to save you even more time

Set up smart rules in Coast to automate coding based on location, department, spend category, and more. Determine your rules, choose what fields to sync, and let Coast do the heavy lifting.

Coast partners with Stripe and Celtic Bank for the Coast Visa® Commercial Credit cards. Card products are issued by Celtic Bank. All card accounts subject to credit approval.
